

Mentors @ Work

Online Web Demos- Mentors At Work Apprenticeship System

In February, VeriFacts Automotive is offering a series of free online web demonstrations of the Mentors At Work apprenticeship system. Over the past eight years Mentors At Work has been assisting shops in putting together effective, structured apprenticeship systems, developing and growing the technicians they'll need for the future. In October, VeriFacts Automotive acquired Mentors At Work. With workforce development such a critical factor in the collision repair industry it was a natural extension to the VeriFacts technician coaching programs.

Every Monday in February, at 11 a.m. Eastern, VeriFacts will be hosting these free, 45 minute, online demos. After attending the online meeting, participants will understand how the proven Mentors At Work system works. To participate, contact Mark Claypool at 949-272-3830 or by e-mail via info@mentorsatwork.com.
